Intermediate crops in policy

- Intermediate crops grown on existing crop land can avoid land use change emissions & ecological impacts of agricultural expansion...
- ...IF using them for biofuels does not stimulate ILUC

[ETIP-Bioenergy Cerology Low-ILUC-intermediate-crops-v0_2-CS-1.pdf \(etipbioenergy.eu\)](#)

Which crops?

- Three crops with good potential (even in low input agricultural systems)
- Camelina
 - Carinata
 - Crambe

[Marginal Land and Industrial Crops for Innovative Biobased Value Chains \(etipbioenergy.eu\)](#)

Farmers' engagement

- Involve farmers & their advisory services-
- Let them oversee field trials and share their experience with the others (farmers trust who they know)
- Learn from best practices

[2024.10.04-COOPS-AGRO-ES.pdf \(etipbioenergy.eu\)](#)

Economy & environment

- Value chain approach
- Worldwide intercrop concepts differ – consistency in definitions will be critical for implementation
- ..in the end the big question is, what will be scaled up!
